

CUSTOM PRODUCTS

At Pierce, our experts stand behind your product every step of the way. Our production staff operates within the strictest manufacturing and professional standards. Our project managers keep your job on the move and on schedule. And our quality control specialists make sure each product is rigorously tested prior to delivery and product launch.

We're by your side after your equipment is delivered, too. You can rely on Pierce for on-site training and troubleshooting. Our parts department and warehouses are stocked with the parts you need, when you need them. And our professional technicians are at your service 24/7 to keep your operation on track and on schedule.

From complete purpose-built turnkey solutions to custom conversions and work tools count on Pierce to come through with the proven performance you need. And the dedicated service you expect.

“Pierce built, Pierce backed” is more than a slogan for us. It’s our idea of what real customer service is all about.

YOUR EQUIPMENT, YOUR WAY.

Since 1931, Pierce has built a solid reputation for designing and manufacturing products that meet rigorous OEM standards—as well as your own specific requirements.

Trust our skilled production team to manufacture according to your proprietary engineering drawings. Or count on our experienced design team to engineer the custom product you envision.

No matter which way you go, you can be assured that your project is custom-engineered to build profits. And productivity.

OEM. WE GET IT.

Over the years, a lot of big names have relied on Pierce. Maybe it's because our products are designed and built to meet their extreme quality standards. Maybe it's because we excel at collaborating with them to assure proper performance and product integration. Maybe it's the confidence they feel in knowing that each product is thoroughly verified and recorded prior to delivery—and completely supported after. Or maybe it's because we have the same objective: meeting the challenging demands of customers like you.

CUSTOM PRODUCTS

LET US PUT OUR OEM EXPERIENCE TO WORK FOR YOU.

The key to producing industry-leading equipment? State-of-the-art design tools with structural stress analysis and motion analysis software. A technologically advanced manufacturing plant with cutting-edge machine tooling. And a corporate culture that accepts only the very best from professionals who adhere to the strictest quality and industry standards.

Our expertise in hydraulic and electrical control systems helps us provide complete product solutions that are ready to take on the heaviest industrial applications. Solutions that support your investment by keeping pace with changing industry conditions and engineering technologies.

At Pierce, your project will benefit from the same levels of precision, efficiency, and attention to detail we provide to OEMs. We wouldn't have it any other way.
