

GABBS &
CONVERSIONS

PURPOSE-BUILT FORESTRY CABS.

Pierce rear-entry forestry cabs take operator safety seriously. The riser/cab design provides superior strength and durability, as well as safe access and egress. The operator is positioned forward and toward the outside of the machine for better boom/work tool control and track visibility. Greater comfort is part of the package, too. Pierce cabs are wider, so there's plenty of room to work. We've included a high output combination heater/air conditioner mounted internally to accommodate the spacious interior, along with a dedicated defrost unit and two adjustable fans for greater ventilation and circulation. When it comes to safety and comfort, Pierce rear-entry forestry cabs rule.

BUILT WITH A VIEW TOWARD FORM AND FUNCTION.

HINGED WINDOW WASH STEP

SAFETY RAILINGS

SIDE ENTRY CAB

SIDE ENTRY FORESTRY CAB WITH SHORT RISER

SIDE ENTRY FORESTRY CAB WITH 48" RISER

CERTIFIED TOUGH.

For testing and certification requirements, load assessments are first simulated electronically to assure that our forestry cabs are capable of exceeding the appropriate pressure and impact tests. Then side impact, rollover (ROPS) and falling object (FOPS) protection tests are physically executed on the machine's mainframe.

Contact Pierce for certification requirements including Oregon OSHA and Canadian BC WCB specifications.

EXCLUSIVELY

FORESTRY CABS

FORESTRY CAB FEATURES	SIDE ENTRY	REAR ENTRY
SAFETY		
<ul style="list-style-type: none"> • Riser/cab design offers excellent track & work area visibility. • Work lights: front and rear. • Skylight offers superior visibility in high decking, helicopter, felling and above grade applications. • Intermittent, variable speed windshield wipers (with washers) for maximum visibility. • Emergency escape hatch. • Rear window visibility toward rear work area & counterweight. • Angled backer bars behind front and side windows minimize visual obstruction. • Ladder and grab handles for safe access & egress. 	<ul style="list-style-type: none"> • • • • • • • 	<ul style="list-style-type: none"> • • • • • • •
STRUCTURE		
<ul style="list-style-type: none"> • Superior strength-to-weight ratio is achieved using high grade materials and efficient designs. • Hydraulic tilt riser. • Fixed: 9" riser. • Operator protection and window guarding. • Heavy-duty adjustable door latch and oversized hinges. • Riser door access to cab hydraulics, electrical system and tilt mechanism. 	<ul style="list-style-type: none"> • • • • • 	<ul style="list-style-type: none"> • • • • •
COMFORT		
<ul style="list-style-type: none"> • H.D. antishake bracket: dampens operational vibration found with taller risers. • Rear side slider windows offer greater ventilation. • Interior components from factory machine are utilized, Pierce interior lighting, controls, instrumentation and materials complete the package. • High-output combination heater/air conditioner, mounted inside the cab, offer maximum comfort in extreme temperatures. • 2 front ceiling fans. • AM/FM/CD player with 2 speakers and remote. • Fully coated and upholstered interior dampens sound and vibration. • Satellite radio. 	<ul style="list-style-type: none"> • • • • • • • • 	<ul style="list-style-type: none"> • • • • • • • •
OPTIONS		
<ul style="list-style-type: none"> • Safety railings. • Passenger side access and egress options. • Hinged window-wash step. 	<ul style="list-style-type: none"> • • • 	<ul style="list-style-type: none"> • • •

A Link-Belt 290LX excavator is shown in a forest setting. The machine is white with a red boom and bucket. It features a large, protective metal cage (forestry guarding) over the cab and engine area. The excavator is positioned on a log skid trail, surrounded by dense green forest. The background shows tall evergreen trees under a clear blue sky.

OUTER ARMOR: EXTEND THE LIFE OF YOUR MACHINE.

Armor your machine with purpose-built forestry guarding that will extend the service life of your equipment. Select an armor package, or individual options to suit your needs.

FORESTRY CONVERSIONS

CAB OPTIONS:

Forestry cabs

- Side entry
- Rear entry

Excavator cabs

- Cab risers: 9", 24", 36", 48", 60", 72", 120"
 - Hydraulic tilt
 - Manual tilt
- Cab guard
- Hinged front screen

ARMOR OPTIONS:

- Heavy duty underhouse guards
- Heavy duty catwalks
- Heavy duty pump and radiator doors
- Optional: hard doors/panels all around (in addition to pump & radiator doors)
- Side bumper/rub guards
- Cab side ladder with pocket step behind cab/riser
- Right hand corner guard
- Optional: hockey stick log deflector addition to right-hand corner guard
- Intake guards
 - Fuel fills
 - Hydraulic oil fill
- Additional fuel tank
 - Right front corner
 - Sandwich-style
 - Top-mount
- Storage compartment
 - Right front corner
 - Top-mount counterweight
- Additional counterweight
 - Top-mount
 - Undermount
 - Sandwich-style
- Non-skid traction surface on upper structure
- Finish paint

UNDERCARRIAGE OPTIONS:

- High and wide undercarriage (high walker)
- Idler reinforcement
- Heavy-duty top roller brackets
- Heavy-duty travel motor covers
- Swivel guard
- Rock guards
- Recoil spacers

HYDRAULIC & ELECTRICAL OPTIONS:

- Grapple system (open/close/rotate)
- Grapple circuit control valve
- Auxillary plumbing
- Pilot flow controls
- Soft swing
- Boom limit switch (hoist only)
- Spool limiters
- 100 Amp alternator
- 24V-12V converter
- Battery disconnect switch
- LED work light packages

ATTACHMENT OPTIONS:

- Hoist cylinder guard
- Stick cylinder guard
- Heel rack to fit excavator stick & bucket cylinder (and coupler)
- Reposition tool cylinder to undermount configuration
- Boom lift kit: repositions hoist cylinders
 - Saddle mount
 - Boom adapter
- Droop nose adapter (nose cone: for excavator mounted processor)
