PIERCE

PIERCE

In-house design team: check. Sophisticated manufacturing capabilities: check. Product testing and certification, technical support, and convenient distribution centers throughout North America: check, check, and check. With so much to offer, we're ideally positioned to provide complete solutions for all of your business needs.

From ordinary to extraordinary.

As a leading designer and manufacturer of hydraulic excavator attachments and work tools, Pierce has built a solid reputation for providing reliable, high performance products that are designed to keep pace with changing industry conditions — and one step ahead of emerging technologies.

Our position as a direct supplier for many of the world's leading equipment providers has enabled us to become experts in client collaboration, managing specific application parameters, and maintaining the highest quality standards for a variety of markets. Even if your needs call for a customized solution that doesn't currently exist, you can count us to make it happen — and make it happen right. Imagine that.

UNDERGROUND MINING

TOUGH TOOLS FOR A TOUGH JOB.

Underground mining is a job that redefines harsh. Which is why you need a tool that redefines tough.

Unlike standard OEM equipment, Pierce scaling fronts are purpose-built to withstand the rigors of underground mining. And because no two mines are the same, each front is engineered and configured to fit your specific application and environment. All while ensuring a safer work area for those inside and outside the machine.

Since Pierce fronts are uniquely designed for underground mining, you can expect them to stand up much better to wear and tear. Which means reduced maintenance costs and greater longevity compared to standard factory digging booms.

READY TO REPORT FOR EXTREME DUTY.

PURPOSE-BUILT SCALING FRONTS

FEATURES:

- Extreme duty straight main boom and excavator-style stick sections.
- Single or twin stick cylinders.
- "Captured" main-to-stick pin.
